

Magnetism — Workout

ICSE Class 6 Physics · 10 MCQs · 1 mark each · Name: _____ Date: _____

Syllabus: Whole chapter: natural & artificial magnets, magnetic substances, properties of a magnet, magnetic field, electromagnets and their uses, care, storage and demagnetisation.

Instructions: Each question has one correct option. Tick or circle the letter of the best answer. Attempt all questions.

1. The natural magnet magnetite is an ore of:

- | | |
|-----------|--------------|
| A. copper | B. lead |
| C. iron | D. aluminium |

2. A bar magnet picks up the most iron filings at its:

- | | |
|-----------|---------------------|
| A. middle | B. two ends (poles) |
| C. back | D. front face |

3. Which statement is correct?

- | | |
|-----------------------|--|
| A. Unlike poles repel | B. All poles attract |
| C. Like poles attract | D. Like poles repel and unlike poles attract |

4. A single isolated north pole:

- | | |
|----------------------------|-------------------------------------|
| A. is the same as a keeper | B. is found in lodestone |
| C. cannot exist on its own | D. can be made by breaking a magnet |

5. Outside a bar magnet, the magnetic field lines go from:

- | | |
|-------------------|-------------------|
| A. pole to centre | B. N to S |
| C. S to N | D. centre to pole |

6. An electromagnet loses its magnetism when:

- | | |
|------------------|--------------------------------|
| A. it is painted | B. the current is switched off |
| C. it is stored | D. it is cooled |

7. The strength of an electromagnet does NOT depend on:

- | | |
|---------------------------|------------------------|
| A. the colour of the wire | B. the number of turns |
| C. the core material | D. the current |

8. A scrapyard crane uses an electromagnet rather than a permanent magnet because it can:

- | | |
|-----------------------------|--|
| A. lift only plastic | B. never drop the load |
| C. work without electricity | D. be switched on to lift and off to drop the load |

9. To preserve their magnetism, bar magnets are stored with:

- | | |
|--|---------------------------------------|
| A. unlike poles together and soft-iron keepers | B. their poles heated |
| C. them lying on a radiator | D. like poles together and no keepers |

10. Which treatment will weaken or destroy a magnet?

- | | |
|---|------------------------------|
| A. dropping and hammering it repeatedly | B. keeping it with a keeper |
| C. storing it in a dry box | D. keeping it away from heat |

Answer Key

1. C

2. B

3. D

4. C

5. B

6. B

7. A

8. D

9. A

10. A
