

Light — Workout

ICSE Class 6 Physics · 10 MCQs · 1 mark each · Name: _____ Date: _____

Syllabus: Whole chapter: sources of light, types of materials, rays & beams, rectilinear propagation, pinhole camera, shadows and eclipses.

Instructions: Each question has one correct option. Tick or circle the letter of the best answer. Attempt all questions.

1. Which pair are both luminous bodies?

- | | |
|--------------------|-----------------------------------|
| A. Moon and mirror | B. candle flame and electric bulb |
| C. book and table | D. Sun and Moon |

2. We cannot see clearly through a translucent object because it:

- | | |
|-------------------------------------|---------------------------|
| A. lets only part of the light pass | B. lets no light pass |
| C. lets all light pass | D. produces its own light |

3. A bundle of light rays travelling together is called a:

- | | |
|-----------|------------|
| A. shadow | B. pinhole |
| C. beam | D. medium |

4. The clearest everyday proof that light travels in straight lines is the formation of:

- | | |
|------------------|-------------|
| A. sharp shadows | B. rainbows |
| C. echoes | D. heat |

5. The image in a pinhole camera is diminished and inverted because light:

- | | |
|-----------------------------|---|
| A. is reflected at the hole | B. travels in straight lines through the hole |
| C. spreads out at the hole | D. changes colour |

6. If the object is brought closer to a pinhole camera, the image becomes:

- | | |
|-------------|-----------|
| A. smaller | B. erect |
| C. coloured | D. larger |

7. An extended source forms a shadow having:

- | | |
|----------------------------|------------------|
| A. both umbra and penumbra | B. only umbra |
| C. no shadow | D. only penumbra |

8. On a new moon day, when the Moon lies between the Sun and the Earth, we may see a:

- | | |
|------------------|------------------|
| A. rainbow | B. solar eclipse |
| C. lunar eclipse | D. full moon |

9. During a lunar eclipse the order of the three bodies in a line is:

- | | |
|-----------------------|-----------------------|
| A. Earth - Sun - Moon | B. Moon - Sun - Earth |
| C. Sun - Moon - Earth | D. Sun - Earth - Moon |

10. Which of the following is a non-luminous body that we see only by reflected light?

- | | |
|---------------------|-----------------------|
| A. the Sun | B. a glowing filament |
| C. the planet Venus | D. a candle flame |

Answer Key

1. B

2. A

3. C

4. A

5. B

6. D

7. A

8. B

9. D

10. C
