

Light Energy — Lesson 1

ICSE Class 7 Physics · 10 MCQs · 1 mark each · Name: _____ Date: _____

Syllabus: Reflection of light, plane mirror, terms related to reflection, laws of reflection and their verification, normal incidence, formation of image by a plane mirror.

Instructions: Each question has one correct option. Tick or circle the letter of the best answer. Attempt all questions.

1. A ray of light makes an angle of 40° with the surface of a plane mirror. The angle of incidence is:

- | | |
|---------------|---------------|
| A. 50° | B. 90° |
| C. 40° | D. 80° |

2. If the angle of incidence is increased by 15° , the angle of reflection:

- | | |
|----------------------------|----------------------------|
| A. stays the same | B. decreases by 15° |
| C. increases by 15° | D. becomes zero |

3. When a ray falls along the normal on a plane mirror, the angle of reflection is:

- | | |
|----------------|---------------|
| A. 90° | B. 0° |
| C. 180° | D. 45° |

4. When you walk towards a plane mirror at 1 m/s, your image approaches the mirror at:

- | | |
|------------|-------------------|
| A. 0.5 m/s | B. it stays still |
| C. 2 m/s | D. 1 m/s |

5. In the experiment to verify the laws of reflection, the angles are measured from the:

- | | |
|-------------------------------------|---------------------|
| A. edge of the paper | B. reflected object |
| C. normal at the point of incidence | D. mirror surface |

6. A plane-mirror image is described as virtual because:

- | | |
|---|---------------------------------|
| A. the reflected rays only appear to meet behind the mirror | B. it can be caught on a screen |
| C. it is smaller than the object | D. it is laterally inverted |

7. The angle between the incident ray and the mirror surface is called the:

- | | |
|-----------------------|------------------------|
| A. angle of incidence | B. glancing angle |
| C. normal angle | D. angle of reflection |

8. Two parallel rays strike a plane mirror. After reflection they are:

- | | |
|------------------|--------------|
| A. perpendicular | B. parallel |
| C. convergent | D. divergent |

9. Held up to a plane mirror, the small letter 'b' appears as:

- | | |
|------|------|
| A. b | B. q |
| C. p | D. d |

10. In reflection, the normal is a line drawn:

- | | |
|--|-----------------------------|
| A. perpendicular to the mirror at the point of incidence | B. through the image |
| C. parallel to the incident ray | D. along the mirror surface |

Answer Key

1. A

2. C

3. B

4. D

5. C

6. A

7. B

8. B

9. D

10. A
