

Light Energy — Lesson 2

ICSE Class 7 Physics · 10 MCQs · 1 mark each · Name: _____ Date: _____

Syllabus: Real & virtual images, lateral inversion, characteristics of a plane-mirror image, regular & irregular reflection, uses of plane mirrors, speed of light, primary & secondary colours, subtraction of colours.

Instructions: Each question has one correct option. Tick or circle the letter of the best answer. Attempt all questions.

1. Which of the following forms a real image?

- | | |
|-------------------------|-----------------------------------|
| A. a plane mirror | B. a periscope |
| C. a flat looking-glass | D. a cinema projector on a screen |

2. Which capital letter looks exactly the same as its plane-mirror image?

- | | |
|------|------|
| A. B | B. A |
| C. P | D. R |

3. We cannot see our reflection on a tarred road because its rough surface causes:

- | | |
|-----------------------|-----------------------|
| A. diffuse reflection | B. dispersion |
| C. refraction | D. regular reflection |

4. Light travels at 3×10^8 m/s. The time it takes to travel 1 km (1000 m) is:

- | | |
|---------------------------|---------------------------|
| A. 3.3×10^{-3} s | B. 300 s |
| C. 3×10^{11} s | D. 3.3×10^{-6} s |

5. An object that reflects all the colours of white light falling on it appears:

- | | |
|----------|----------|
| A. white | B. grey |
| C. red | D. black |

6. An object that absorbs all the colours of light falling on it appears:

- | | |
|--------------|----------|
| A. invisible | B. blue |
| C. black | D. white |

7. Cyan light is obtained by combining:

- | | |
|-------------------|------------------|
| A. green and blue | B. red and blue |
| C. red and yellow | D. red and green |

8. Yellow is a ____ colour of light.

- | | |
|--------------|-----------------------|
| A. primary | B. complementary only |
| C. secondary | D. invisible |

9. A green glass filter allows to pass mainly:

- | | |
|--------------|----------------|
| A. no light | B. green light |
| C. red light | D. all colours |

10. White light from the Sun is a mixture of:

- | | |
|------------------|------------------|
| A. five colours | B. seven colours |
| C. three colours | D. two colours |

Answer Key

1. D

2. B

3. A

4. D

5. A

6. C

7. A

8. C

9. B

10. B
